A close-up photograph of a hand watering a small green seedling. A single drop of water is suspended in the air between the person's finger and the plant. The seedling has several bright green leaves and is growing out of dark, rich soil. The background is a soft, out-of-focus brown, suggesting more soil or a garden bed. The lighting is warm and directional, creating a sense of care and growth.

## Our HLS Community

In addition to the Q&A and messaging mechanism in each course, you can use the following websites to ask questions that may not fit the course subjects or communicate with other people with the same interests.

- 1- The course weblog is <https://highlevel-synthesis.com/>, where I regularly publish articles about HLS.
- 2- The YouTube channel is <https://www.youtube.com/channel/UCbepp45-ABAGDSp2MmtdD8A>, where I regularly put some video about HLS.

## Industry

Xilinx recently has introduced KRIA, an adaptive System-on-Module (SoM) targeting Edge computing and IoT applications. It is based on Zynq UltraScale+ MPSoC and designed specifically for AI vision application. In future, I will more talk about this SoM.

For more information, please refer to the [Xilinx website](#) or this [article](#) on the [hackster website](#).
